

Rolling Ball Painting

A fun but extremely messy way to create your own piece of modern art, which involves rolling a ball around! If you have a large box lid or a tray you can contain this painting project safely - otherwise, beware as the ball will fall off the table.

You will need:

A ball

Large piece of paper

Paint

If indoors, LOTS of newspaper!

Lay down the newspaper on the floor to protect where you are working, and place your paper on top of it.

Dip a ball into paint and put it on your paper.

Roll, push, drop, bounce the ball around the paper to and fro with your child

Use another ball of a different size or wipe the original ball and repeat with more colours until you are happy with your picture.

NB if you have a tray or similar that will fit your paper, you could contain your ball with it!
