I can describe the use of the natural environment by people in present day

Think about what we use from the natural environment, things we take for granted, for example, rivers, forests, beaches. Watch the two bitesize videos below for more information.

Humans and the environment

When you think about rivers, what do you think of? Ships, fish? We use ships to export goods to other countries or bring goods to our country. We use rivers to catch fish for food. These are just a couple of ways that people use the natural environment in present day.

Task - Treasure hunt!

Using your detective skills, see if you can find the following.

- 3 items that are made from trees?
- 1 item from the sea/river
- 2 items that use soil
- 1 item that uses air

You can use the internet or have a look around in your home or outside space. Draw a picture of what you find, or even take a photo and send it to us.

What else can you find that you use from the natural environment?

Happy hunting!
