

Evaluating my design and product

Justification	What went well	Even better if
Overall design of product		What would you change about it?
Circuit		How could you improve your circuit? Would you change the type of circuit you used?
Appearance		How could you improve how your product looks?
Materials and components of circuit		Would you change any materials/components you used? Why?

Evaluating my design and product

Purpose	Give 2 reasons why someone would like your product.	What could you add or improve that would make someone like your product more?
----------------	---	---

Rating How would you rate your design and product out of 10? Why?
