

PAPER PLATE FISH ART

You can make a fish with a paper plate, and decorate it in any way you like.

What you need:

- large paper plate
- blue paint
- scissors
- colourful paper or tissue paper or coloured paints
- glitter (if you want)
- glue
- black marker
- white paper

How to make the fish

Colour the paper plate blue (or any other colour you wish) and allow the paint to dry completely.

Cut a small triangle out of the paper plate. This will make the fish mouth (and the extra bit will be used for the tail).

Glue or staple the triangle on the paper plate.(You can also do this at the end.)

Cut a circle out of white paper. Draw a dot inside that circle with a black marker. Look you just made an eye!

Glue the eye on the paper plate above the mouth.

Now you can decorate your fish however you want!
