## Activity

There are some incredible landmarks across the UK, from Big Ben to Edinburgh Castle. Recreate some of your favourite famous landmarks to save you having to go and visit them all!

- Your landmark could be a manmade building or structure, or a natural feature.
- Think carefully about what size it should be – should it include certain shapes?
- What specific features does your landmark need to have?
- You could use natural materials that you can find outside or manmade materials.
- Look at a photo of the landmark to try to add more attention to detail.

## What could you use?

A range of small and large materials e.g. recycling, scrap construction, materials, natural items, and other bits 'n' bobs!

This activity develops problem solving and critical thinking which supports **STEM** learning and it is an active link to **Geography** topics on different places around the world. Challenge the children to:

- Add some tourists who are enjoying their visit to the landmark.
- Make facilities such as a car park etc.
- Create the landmark from different perspectives e.g. birds eye view etc.
- Write an advert or make a poster to encourage people to visit your site.
- Make the landmark to a chosen scale.
