

Computing – Week 5 – 18.5.20

Using Google Earth

Last week we looked at the Mappa Mundi and compared it to Google Earth.

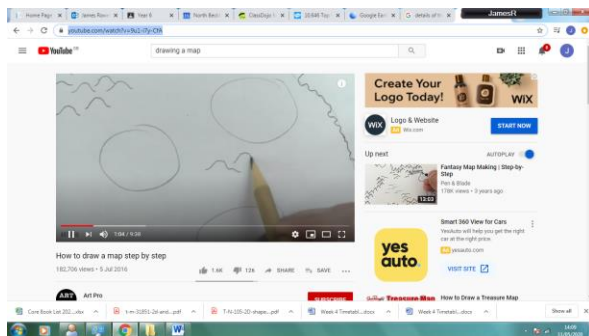

Thinking about everything you have learned in computing this half term, I would like you to create a map of your local area. Just like ancient maps, it doesn't have to be accurate and only has to include things that are important to you. You could do this from memory and using Google Earth to zoom into your area

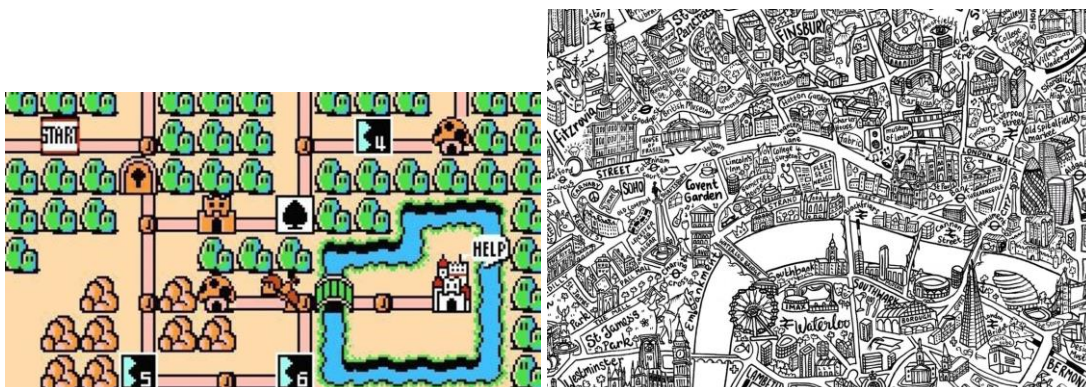

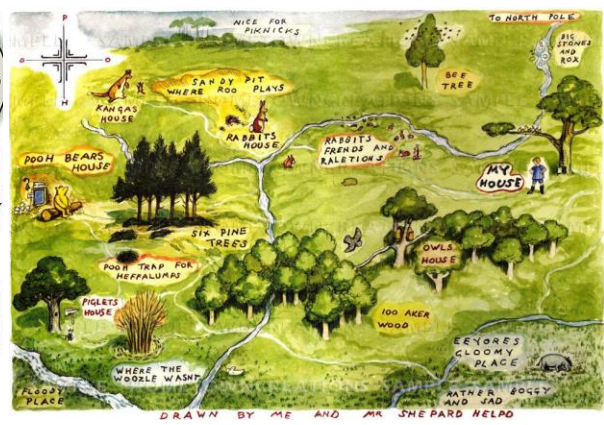

The map makers of the Middle Ages didn't always get the detail exactly right and included items from myths and legends. Could you take inspiration from this when creating your map?
