A Guide to Use of
Letter Group Review, Word and
Sentence Practice
Worksheets

Learning of a motor skill usually happens in three stages. These stages of motor learning were used to develop this printing program.

1. Beginning Stage (Level I): (This is also known as the *Cognitive Stage* of motor learning). During the first stage, the Level I, *individual* letter worksheets* are used. These worksheets include the use of many cognitive strategies to guide and support the student's learning. Cognitive strategies include:

- Numbered arrows
- Out loud self-talk of letter formation
- Self-evaluation as well as
- Use of "key strategies for neat printing", such as printing slowly, correct letter formation, and sizing. Please see example of "key strategies" cue sheets included in worksheet sets.

2. Intermediate Stage (Level II): (This is also known as the *Associative Stage* of motor learning). The current worksheets* focus on the second stage of learning. Use of cognitive strategies is gradually faded. For example, the student is encouraged to "silently say" the letter formation verbal cue rather than "out loud" self-talk. In this stage, the worksheets focus on more self-evaluation.

Strategies include:

- Fading of numbered arrows
- Fading of the dotted interline
- *Silent* self-talk of letter formation, fading to *no* self talk
- Self-evaluation *and* self-correction of all important parts of legibility using "key strategies" for neat printing
- Random practice of letters learned
- Combining of letters into words
- Self-monitoring of work

These worksheets have been designed in 4 phases of practice:

- Phase 1 - Non-random letter review: Review practice of all letters within a group in the same order as before.
- Phase 2 – Random letter review: Random review practice of all letters within a group.
- Phase 3 – Word practice: Word printing practice using all letters within a group.
- Phase 4 - Sight Word Sentences: Sentence printing practice using common simple sight words.

It is best if the worksheets are done in this order.

Phase 1 and Phase 2 – Letter Review Worksheets (Non-random and Random Review):

Work on each review group until you feel the student has learned all the letters in the group. The student should be able to easily and automatically remember how to print each letter correctly. Neat printing is important. Encourage the student to focus on key strategies for neat printing such as:

- Well placed letters on the lines
- Good height and size of letters
- Good spacing between the letters

Phase 3 - Word Printing Practice Worksheets:

Work on each word group until you feel the student can easily and automatically print each word. Neat printing is important (please see above). Also focus on the spacing between words (use index finger for correct spacing). Then move on to the next group.

Phase 4 - Sentence Printing Practice Worksheets:

Work on each sentence worksheet until you feel the student can easily and automatically print the sentences. Neat printing is important (please see above). Also focus on spacing and correct capitalization and punctuation.

3. Final stage: (This is also known as the *Autonomous Stage* of motor learning). In this final stage, printing becomes automatic. The student can now easily and automatically form all letters, neatly print words and sentences. With additional practice, printing skills will continue to improve (e.g., speed). Further skill refinement occurs through writing practice in the classroom. Additionally, “Skill Boosting*” worksheets, such as Number worksheets can be used, focusing on classroom friendly activities to further increase legibility and especially to increase speed.
