Summer 1 Week 2

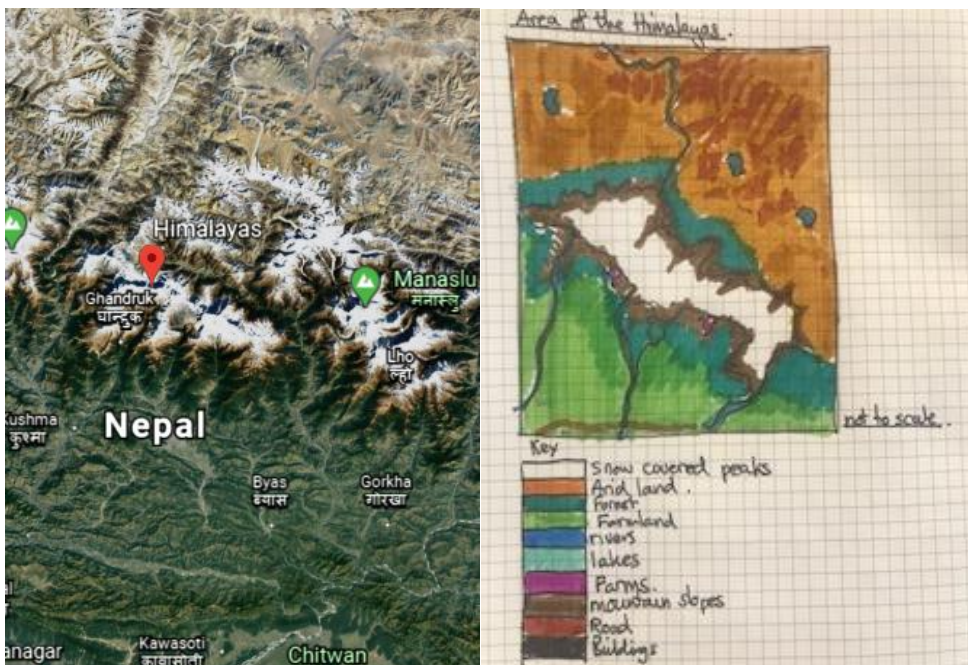

This week, we will be drawing and listing features of the environment using Google Earth to help. These might include natural ones such as mountains, lakes or other landforms. They could be man-made and take the form of cities or ports for example.

Think about the land forms listed in some of the Purple mash quizzes from last week.

Find 4 areas on Google Earth that interest you. Draw and list the features of the environment.

Find as many as possible and represent them on your map using shading, patterns or colours. Don't forget to include a Key.

Above is my example, if you use Google Earth to zoom in close, you start seeing things that you didn't realise were there. When I zoomed right in, I discovered the farms, so was able to give my map a little more detail.
